

Alex Lutterloah

Software Engineer

SUMMARY

Results-driven and highly motivated individual aspiring to embark on a career as a Software Engineer with a leading tech company. Possessing a proven ability to learn quickly and adapt to evolving technologies, I am eager to contribute my skills within an industry-leading organization.

WORK EXPERIENCE

Origen Financial Services

IT Document Specialist | Southfield, MI (WFH)

June 2021 — Present

Tasked with programming documents for electronic signature and dynamically populated data. Responsible for maintaining a robust SQL database, ensuring data accuracy and integrity. Proficient in creating dynamic and visually appealing documents using Ecrion software, utilizing XML/XSL for efficient document generation.

The Barter Authority

Administrative Manager and Broker | Richmond, VA

September 2017 — June 2021

Performed all operational accounting tasks for the business, processed payroll, expenses, maintained legal compliance, insurance audits, and other operational tasks. Created long-term trusting relationships with clients and actively sought new sales and transactions.

EDUCATION

Bachelor of Science (B.S.), Computer Science

Virginia Commonwealth University, Richmond VA
May 2024

100Devs – Full-stack Software Engineering Bootcamp

Virtual, January – August 2022

RECENT PROJECTS

AutoScripter – A multifaceted tool that I developed in C# to assist with my role at Origen. Capable of creating SQL document configurations, new field SQL configurations, and formatted XML data. Features include drag and drop files, text box generation per file for va manipulation, excel file reading to output XML, and other helpful features.

Capital One Health Dashboard – A full stack web application utilizing Node JS, React JS, and Amazon DynamoDB. This was a VCU Capstone project working with a Capital One sponsor to develop a health dashboard for a line of business.
